So if you want to keep your personal files, data, customized settings, and other data, then don't perform a clean install, instead, simply update your macOS to the latest version.. Performing clean install of macOS Catalina 10 15 on Mac/MacBook has many benefits and most of the users keep doing this.

1. clean macos catalina install
2. clean install macos catalina without usb
3. how to clean install macos catalina and older versions

The only disadvantage of clean install macOS is, the hard drive of Mac is erased in this procedure along with customized settings.. Clean install or Clean Restore people mostly like to fix all kind of serious issues and use MacOS like Normal.
